

# History of Europe from the Commencement of the French Revolution in 1789 to the Restoration of the Bourbons in 1815, Vol. 17 (Classic Reprint)

Historical narrative, how important or interesting soever the events may be which it embraces, is not the lxxviii. species of composition which gives the best insight into jgg the character of the actors in the scenes it records. Genei. ral causes are there too much wound up with perJ esmmT sonal agency; the stream of human transaction is too anecdote in vast, its floods too overwhelming, to permit the salient tion of dia- points of individual disposition to be adequately developed, racter. even in those who have been chiefly instrumental in directing its current. It is private incident which pourtrays the real man: it is in the habits of domestic life that we are to seek the true touchstone both of the greatness and the weakness of humanity. The common maxim, that no man is a hero to his valet de chamhre, indicates the universal concurrence of all ages in this truth. The characters in public life, accordingly, which are most deeply engraven on the memory of mankindj are not those by whom the most important changes in history have been wrought, but those of whom the most graphic and touching incidents have been recorded by writers of capacity sufficient to discern their value.
